

Gett Gains Competitive Edge by Significantly Shortening Its Vendor Risk Management Process

A 3D architectural rendering of a city with white buildings of various heights and shapes, some with orange or blue bases. A sign with the "Gett" logo is visible on one of the buildings. The scene is set on a white, grid-like street pattern with small white trees and streetlights.

Gett

About Gett

Available in more than 120 cities worldwide, including London, Moscow and New York, Gett is Europe's largest on-demand car service company by revenues. In London alone, nearly half of all black cabs run on Gett.

Gett Business Solutions sets a new standard for corporate ground transportation, enabling companies and riders to book rides and track expenses worldwide through a single platform. It is already used by more than 20,000 companies worldwide who book and track mobility services in over 56 countries.

Challenge

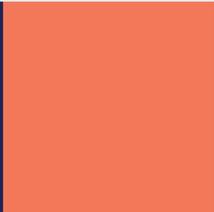

- Improve manual supplier vetting

Solution

- Centralized and user-friendly vendor assessments

Added Value

- Competitive edge
- Rapid & thorough security evaluation of vendors
- Centralized solution for all vendor materials
- Simple, easy-to-learn user interface

THE

Challenge

"We wanted something that really focused on managing third-party security evaluations."

Eyal Sasson, CISO, Gett

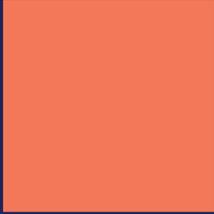

Improve Manual Supplier Vetting

Eyal Sasson, CISO at Gett, was looking for a better way to manage his company's third-party security. Gett's many vendors underwent a lengthy vetting process to check that their security posture was strong.

"There was a lot of back-and-forth between us and the vendors," Sasson explained. "It could take a while to hear back, then usually there was at least one follow-up."

Sasson knew that to remain competitive, the company needed to streamline the process. His goal was to ensure security without slowing business processes. For this reason, he started searching for a comprehensive solution with a simple user interface that could serve as a centralized repository for all vendor interaction and assessments.

"We wanted something that really focused on managing third-party security evaluations," he said.

THE

Solution

"I want to invest the least amount of time and effort as possible on evaluating vendors. Panorays helps me do that."

Eyal Sasson, CISO, Gett

Centralized and User-Friendly Vendor Assessments

After starting to work with Panorays, Sasson immediately noticed a reduction in the time and effort that was spent on vendor security evaluations. He and his team found the platform to be extremely user-friendly, and they were able to easily and rapidly add their suppliers to the system.

"I want to invest the least amount of time and effort as possible on evaluating vendors," he noted. "Panorays helps me do that."

Sasson particularly liked receiving a quick general security rating of vendors within 72 hours, which provided him with an overview before receiving the results of the security assessments. He also appreciated having a centralized platform where he could file all his vendor-related material and ratings.

"I really like the feature of being able to upload files, so that I can add additional communication with suppliers," he said. "If we have an old questionnaire on an Excel sheet, I can easily upload that to the system. This is my favorite feature."

THE

Conclusion

“With Panorays, we can quickly start doing business with new partners without compromising on security. Having such a rapid process in place keeps us on top of our competition.”

Eyal Sasson, CISO, Gett

A Business Enabler That Accurately Identifies Risk

Now that he has a shorter vetting and onboarding process in place, Sasson is convinced that the Panorays solution acts as a business enabler for Gett.

“With Panorays,” he said, “we can quickly start doing business with new partners without compromising on security. Having such a rapid process in place keeps us on top of our competition.”

But ultimately, Panorays gives Sasson peace of mind as a CISO.

“Panorays gives me reliable information to distinguish between the vendors that are high-risk and those that are not,” he said. “That’s the best part of all.”

About Panorays

Panorays automates third-party security lifecycle management. With the Panorays platform, companies dramatically speed up their third-party security evaluation process and gain continuous visibility while ensuring compliance to regulations such as GDPR, CCPA and NYDFS.

It is the only platform that enables companies to easily view, manage and engage on the security posture of their third parties, vendors, suppliers and business partners. Panorays is a SaaS-based platform, with no installation needed.
