

# ServiceNow Integration

Panorays is integrated with ServiceNow and is an approved member of the ServiceNow Partner Program. This allows customers of ServiceNow to receive Panorays' Cyber Posture data through the ServiceNow app.

## The Integration

Panorays' Cyber Posture Rating is derived from a non-intrusive external footprint assessment of a supplier's attack surface, and uses big data analytics and advanced research and reconnaissance capabilities to pinpoint security gaps. The rating is a calculated average of ratings representing the cyber resilience of three layers: network and IT, application and human.

All of the cyber posture data is readily available to both the supplier and the evaluator on the ServiceNow app. This ensures transparency as to how the rating was calculated and enables communication and the ability to challenge any of the findings. Panorays also continuously monitors the supplier and updates this rating accordingly, while providing live alerts of any changes to cyber posture.

The screenshot shows the ServiceNow interface for a Vendor Risk view. The main content area displays the 'Panorays Attack Surface Rating' as a yellow circle with the score '63.19'. Below the score, a legend indicates: '0-59=red, 60-79=yellow, 80-100=green'. The 'Panorays' tab is selected in the bottom navigation bar. Other tabs include Contact, Profile, Risk Scoring, and Panorays Score Breakdown. The 'Sync vendor with Panorays' checkbox is checked, and the 'Primary Domain' is 'sup1.com'. The 'Score Last Updated On' is '2020-08-12 01:21:57'.

## FAQ

### Where can I find Panorays on the ServiceNow store?

Panorays can be found on the ServiceNow store [here](#), and requires minimal installation to get started. Users must have an active Panorays third-party security management subscription to use the integration.

### Which cyber data will I have access to?

Currently, ServiceNow customers can access data from the Cyber Posture Rating, which is a calculated average representing the cyber resilience of three layers: network and IT, application and human.

# About Panorays

---

Panorays quickly and easily automates third-party security risk evaluation and management — handling the whole process from inherent to residual risk, remediation and ongoing monitoring. Unlike other solution providers, Panorays combines automated, dynamic security questionnaires with external attack surface assessments and business context to provide organizations with a rapid, accurate view of supplier cyber risk. It is the only such platform that automates, accelerates and scales customers' third-party security evaluation and management process, enabling easy collaboration and communication between companies and suppliers, resulting in efficient and effective risk remediation in alignment with a company's security policies and risk appetite.

The company is offered as a SaaS-based platform and serves enterprise and mid-market customers primarily in North America, the UK and the EU. It has been adopted by leading banking, insurance, financial services and healthcare organizations, among others. Headquartered in New York and Israel, with offices around the world, Panorays is funded by numerous international investors, including Aleph VC, Oak HC/FT, Imperva Co-Founder Amichai Shulman and former CEO of Palo Alto Networks Lane Bess.
